Additional comments

MDP Doors recently repaired the door to Highways Unit 3 – as the hinges to the concertina door had come away from the wall.

All 3 doors are in need a service, as they are very stiff and hard to move. Comments MPD Industrial Doors is that a service will not make much difference. The doors are very heavy and outdated (probably from the 70's).

The service recommendations will be to replace them with galvanised roller shutter blinds.
