COSAC Committee

Footpath and other issues

. Early December- Watery Lane rain water flows onto Sully Rd, it goes into the ditch on the opposite side but in heavy rain it backs up and collects on the road. I reported back to Malcolm Phillips who had asked me to look at it in the first place.

. 18th Decemcber 2024- I found the Cwm George path blocked by 2 tree trunks. I reported this to Jeanette who arranged for them to be moved, hopefully before Christmas. They have now gone.

. 6th January 2025- The path between Murch Crescent and Aberdovey Close is breaking up at the Murch Crescent end. Two thirds of the path has already been resurfaced.

. 7th January 2025- At the entrance to Tesco car park there is an increasingly deep hole. I think it could be quite had to miss it at times.
