****The APP allows you to set and unset the alarm plus you will receive notifications when the alarm is set/unset or activates.***

This company also has 3 other local councils who they supply and installed systems.

Quote 2

To supply and install a new Wireless Intruder Alarm System as detailed in the Design Proposal.

£399.00+VAT

1st year app included in price / after this £79 per year – including service / replace batteries every 2 years

This installation will also come with the following free of charge:

Two Proximity Tags normally priced at £20.00+VAT

The proposed alarm system will be enabled for APP connectivity via a smartphone (Android 6 or IOS 8 or above Device only). The App allows the setting and unsetting of the alarm system via the device remotely, ability to omit individual zones, check the status of the alarm. The system can also be configured to provide “push” notifications to authorised devices when the system is set/unset, there is a fault or an alarm activation.

In the event of an alarm activation the alarm system will activate an audible warning and provide a push notification via the Cloud server to authorised handsets.

The alarm system will connect to the Cloud via a Network Connection and communication will be via the properties existing internet connection and router.

Please be advised that notification and use of the app will only be possible with the presence of a working internet connection at the property.

The App is subscription-based services with an annual fee. The alarm system can operate without the connection should you wish to cancel the subscription at a later date, although an engineer visit would be required to disable the device and disable the fault reporting for loss of connection (the visit would be at a charge, for a change to the system).

Wireless/Hybrid Intruder Alarm – Grade 2

Description	Qty	Price/Rate	Amount
Wireless Intruder Alarm 1 x Main Panel 1 x Door Contact (office door) 1 x PIR Office 1 x Bell Box 2 x Panic Alarm Fobs App Connectivity with 12 months free with install. £20 for each year after. or £65 for maintenance with app renewal included. Additional detection will be priced at £60 per device extra	1.00	495.00	495.00
Fused Spur, installed by NIC Electrician	1.00	250.00	250.00
TOTAL			£745.00

Notes:

Please note the electrician's price can be removed, so quote will be reduced to £495 all in, for the Intruder Alarm only.

Local company, Fused Spur – is currently in the Parish Hall we have been advised to move this as it should be in the Office due to safety

Quote 4

We could omit the Hall Door Sensors which would reduce the cost to **£635 + VAT**

The £635 + VAT would include a Wireless PA Button for Clerk/Admin usage.

The New system can also connect to the Wi-Fi and authorised persons could ARM/DISARM the alarm system from an APP on their mobile phones.

The Mobile APP service is free for the **first 12 Months and then £36 per year thereafter.** (This cost is per site, NOT per person).

In preparation for the new Alarm, at no cost to (company installing)
we would need an unswitched 230VAC Fused electrical outlet (Fused Spur) to be installed within the Office (Location to Be Agreed so DDPC would have to source a company to do this)

Fused Spur – is currently in the Parish Hall we have been advised to move this as it should be in the Office due to safety
